**CDs**

Certificates of Deposit (CDs), including Market Indexed CD s and Market Linked CDs (collectively, MCDs) are generally shown at estimated market prices based upon a matrix or model pricing method that may not represent the actual price if sold prior to maturity. However, CDs and MCDs may be shown at face value for up to seven calendar days from date of issue if estimated market prices have not been received from a third party pricing vendor. The actual value of CDs and MCDs may be different from their purchase price. CDs and MCDs are subject to interest rate risk. The estimated market price reflected for MCDs may not be based on the actual closing value of the linked market index on the final maturity date and the market value of MCDs may not correspond directly to increases or decreases in the underlying linked market index. You may sell CDs or MCDs in the secondary market subject to market conditions. The secondary market for CDs and MCDs is generally illiquid. If sold prior to maturity, the value of MCDs may be less than the purchase amount or face value. The sale or redemption of any fixed income security prior to maturity may result in a substantial gain or loss, and an early withdrawal penalty may apply. Certain MCDs may only be redeemed on pre-specified liquidation dates and may have call features that allow the issuer to call the MCD prior to maturity. Certain Step Rate CDs are also subject to reinvestment risk if call provisions are exercised by the issuer and if a CD with a comparable rate is not available.

Bank Deposits are not securities and are not covered by the Securities Investor Protection Corporation (SIPC). Funds are not FDIC insured until swept to a Program Bank. Customers are responsible for monitoring their total deposits at each Program Bank to determine the extent of available FDIC insurance. Your ending balance at each Program Bank as of the end of this statement period is shown below. If you participate in the Bank Deposit Sweep Program, the Bank Deposit Detail section lists banks and ending balances. Funds pending settlement reflect deposits to (credit) or withdrawals from (debit) to a Program Bank. Please refer to the Program Disclosure document for additional details that may impact the program.

## Footnotes and Cost Basis Information

Amortization, accretion and similar adjustments to cost basis have been provided for many fixed income securities (and some bond-like equities), however, they are not provided for certain types, such as short-term instruments, Unit Investment Trusts, foreign fixed income securities, or those that are subject to early prepayment of principal (pay downs). Where current year premium or acquisition premium amortization is provided, the prior years' cumulative amortization is reflected in the adjusted cost basis, but we cannot provide a breakdown or the total of such prior amortization amounts.

NFS is required to report certain cost basis and related information to the IRS on the Form 1099-B. Your official 1099-B forms for certain transactions will reflect which lots have been sold for tax purposes. To apply a specific identification cost basis method to 1099-B reporting, appropriate instructions must be on file with NFS or be received by NFS before the trade has settled. Absent such instructions, NFS determines cost basis at the time of sale based on its default methods of average cost for open-end mutual funds and first-in, first-out (FIFO) for all other (including ETFs) unless your broker dealer has elected to use another default method. NFS applies FIFO (or other disposal method, if applicable) based on its records, which may be different from yours. For transactions that are not subject to 1099-B cost basis reporting, you should refer to your trade confirmations and other applicable records to determine which lots were considered sold for tax purposes.
