

Memo

To: Board of Directors
From: Alan E. Clanin, General Manager
Date: April 24, 2018
Subject: Project Update

1. Vertical Wells –

Electra Drive – The District has received the sample results for the Electra Well. Gross Alpha and Uranium in the water was detected and is higher than State allowable levels. Flushing of the well may reduce the concentration of the elements but treatment may be required. The electrical service is now being installed to facilitate flushing and construction.

2. Billing System Software Upgrade –

District Staff is working with a Tyler Technologies Engineer to configure the legacy software files to the Tyler Incode file format.

3. Hazard Mitigation Plan –

The Hazard Mitigation Plan has been approved by the State of California Hazard Mitigation Office and is now under final review by the Federal Emergency Management Agency. Adopting the Hazard Mitigation Plan can be expected at the May meeting.

4. Lakeview Main Replacement –

District Field Staff has installed the tie-in connections at both locations on Lakeview Drive. Relocated water meter locations have been marked for the property owners and site preparations have begun.
