WATER DISTRICT

Memo

To: Board of Directors
From: Alan E. Clanin
Date: February 17, 2017
Subject: Billing System Software

The District is currently evaluating replacement accounting and billing system software from several suppliers. We are reviewing both server and cloud based systems during this preliminary research. Based on demonstrations, there are a few software systems that offer a very comprehensive modern replacement for the District's current aging system. I will keep the Board updated on our progress.
