Subject: Consider Rotary Request

Valley of Enchantment Elementary School is one of the original existing schools in the Rim of the World Unified School District. Due to the age and condition of the school and the higher number of students, portable bungalow style classrooms are being utilized. The bungalows are located away from the main school structure and lack any drinking water sources.

Rotary Club of Crestline–Lake Gregory is working with Rim of the World Unified School District to provide drinking water to as many classrooms as possible at Valley of Enchantment Elementary School and has reached out to Crestline Village Water District for assistance. Club President Gaston Maya has approached the District with a request to sponsor the purchase of a Drinking Fountain / Water Bottle Filling Station. This is a “no touch”, ADA accessible unit that would allow the students to fill their personal water bottles with metered District supplied water prior to class. Lake Arrowhead Community Services District recently sponsored the purchase of 2 units for Mary Putnam Henck Intermediate School which are a great success. The retail cost for a new unit is listed at \$2,451. The District has the resources to purchase a new unit for \$1,433.07. Following installation by School District Staff, a plaque will be placed at the station noting the District donation.

Recommendation:

Direct District Staff to proceed with purchase of one (1) Elkay EZH2O Bottle Filling Station for a cost of \$1,433.07 to be donated to Valley of Enchantment Elementary School.

Providing our community with a reliable water system that delivers high quality water for its health and safety needs.

Product Description/Details

The Elkay EZH2O® Bottle Filling Station delivers a clean quick water bottle fill and enhances sustainability by minimizing our dependency on disposable plastic bottles. Complete cooler and bottle filling station in a consolidated space saving ADA compliant design. NEW Versatile Bi-Level cooler design allows for standard cooler installation of high-left/low-right or the alternate reverse cooler installation.

Touchless, sensor activation (bottle filler) designed for easy use; easy-to-operate push-bar activation (bubbler).

Fill rate is 1.1 GPM.

Visual filter monitor with LED filter status indicator for when filter change is necessary.

The 3,000-gallon filter is certified to NSF 42 and 53 for lead, Class 1 particulate, chlorine, taste and odor reduction.

Green Ticker informs user of number of 20 oz. plastic water bottles saved from waste.

Laminar flow provides clean fill with minimal splash.

Silver ion antimicrobial protection on key plastic components to inhibit the growth of mold and mildew.

Real drain system eliminates standing water.

Flexi-Guard bubbler provides a flexible antimicrobial mouth guard to protect against injury and microorganisms.

Rated for indoor use.
